

Observed faithful rate

--- perfect calibration
— pooled (context only)
— per-model curve

Pooled meta-analytic:
ECE 0.34 [0.29-0.39]
AUROC 0.82 [0.79-0.85]

Verbalized confidence is not on a common scale across models (Methods); the pooled curve and meta-analytic values are shown for context only, not a shared-scale claim.

Mean stated confidence
